PROFILE SUMMARY

Data, AI & Transformation Leader with 12+ years of experience shaping enterprise strategy and translating business priorities into scalable AI, data, and cloud solutions across regulated industries. Partners with business leaders to identify high-value AI opportunities, translate workflows and domain knowledge into reliable AI solutions, and take initiatives from pilot through enterprise adoption. Experienced in leading multimillion-dollar portfolios, cross-functional teams, change management, AI governance, and value realization while turning complex technology into practical business outcomes.

EDUCATION

Master of Management Sciences, *University of Waterloo*
Bachelor of Technology in Computer Science*, PT University*

PROFESSIONAL EXPERIENCE

Program Manager, AI Transformation Jan 2024 – Present
Intact - Data & AI Lab

- Owned a $15M portfolio of AI, cloud, and platform programs, leading 5+ program managers and 30+ engineers across roadmaps, prioritization, budget, resourcing, risk, and executive reporting; improved delivery throughput by 20%.
- Directed a 164-capability GenAI portfolio, partnering with business and technology leaders to identify, prioritize, and fund high-value opportunities across finance, sales, compliance, marketing, legal, and engineering, with 35 capabilities advanced to production.
- Delivered business-facing GenAI solutions from discovery to production, including AI-Assisted Rating for decision support, Document Intelligence for automated extraction and summarization, and Web Quote capabilities supporting digital customer journeys.
- Scaled IntactGPT to 10K+ Canadian/US employees, reaching ~50% monthly active usage and 2+ hours per active user weekly while embedding AI-assisted knowledge retrieval and summarization into everyday workflows.
- Translated SME workflows, rules, edge cases, and success criteria into requirements for RAG, document intelligence, and automation solutions.
- Delivered Jira AI Assistant from pilot to enterprise rollout across 214 users and 56 projects, using adoption, user feedback, and business-value measures to guide scale-up decisions.
- Established GenAI governance that aligns roadmaps, dependencies, risks, and executive decisions, and coach teams on adopting AI-supported ways of working.

Project Manager, Data & Cloud Transformation Jun 2020 – Dec 2023
Intact - Data & AI Lab

- Managed cross-functional teams of 11+ architects, engineers, and analysts delivering cloud modernization programs across concurrent workstreams, balancing quality, timelines, and budget.
- Migrated a legacy on-prem data platform to Databricks and SageMaker with MLOps for 250+ data scientists, delivering 39 production use cases across 6 domains, 50% faster deployment, and $798K savings in annual licence and infrastructure.
- Modernized actuarial analytics from SAS to governed cloud platforms for 300+ users, using ADKAR-aligned change management and a newsletter to 1,000+ stakeholders that cut post-launch support requests by 40%.
- Delivered enterprise analytics from Qlik to Power BI for 250+ underwriters, standardizing KPIs and automating reporting to improve access to trusted insights and accelerate data-driven decision-making.

Project Lead Oct 2018 – May 2020
S C Johnson

- Led a $5M IoT-enabled healthcare technology program across Product, R&D, Engineering, Data, Quality, and Operations, turning real-time hospital data into insights for patient safety and operational decisions.
- Drove 5+ product and analytics releases from discovery to implementation, translating hospital workflows into data, dashboard, and reporting requirements that helped care teams track performance and improve efficiency.
- Managed customer implementation and continuous improvement, using product telemetry and user feedback to prioritize enhancements and manage delivery risk; achieved 95% on-time milestone delivery.

Lead Business Analyst Feb 2015 – Aug 2018
Business Analyst Feb 2014 – Feb 2015
Wipro Technologies

- Designed and implemented an automated New Generation Pension Scheme workflow on the Appian low-code platform, delivering $1M+ in annual savings.
- Led Agile and Lean transformation initiatives with governance, standardised reporting, and value-realisation metrics, achieving a 15% gain in operational efficiency and faster time-to-market.
- Established change management and training for new systems, increasing adoption among 500+ users and reducing transition issues by 25%; built executive KPI dashboards that drove accountability.
- Owned the product roadmap for the payment solutions platform, translating business vision into technical milestones and sequencing deliverables across engineering streams.

CORE COMPETENCIES

- **AI & Transformation:** GenAI Strategy, AI Use-Case Discovery & Prioritization, Context Engineering, RAG, Agentic Workflows, AI Governance, Pilot-to-Scale, Business Process Transformation
- **Program Leadership:** Portfolio Management, Enterprise Roadmaps, Budget & Resource Planning, Cross-Functional Leadership, Risk & Dependency Management, Agile Delivery (Scrum, Lean, SaFe), Executive Communication
- **Change & Adoption:** ADKAR, Change Impact Assessment, Stakeholder Engagement, Training & Enablement, Value Realization
- **Technology:** Databricks, Snowflake, AWS (SageMaker, Bedrock), MLOps, SQL, Power BI, Jira, Confluence

CERTIFICATIONS

- AI-Empowered SAFe Product Manager (SAFe POPM)
- Project Management Professional (PMP)
- Professional Scrum Master (PSM)
- Professional Scrum Product Owner (PSPO)

ADDITIONAL INFORMATION

- Awarded the *Best Ambassador Award* for leadership excellence, recognized for strengthening collaboration and operational alignment across teams.
- **Work Authorization:** No Sponsorship Required.
- **Women in Agile (Volunteer Board Member):** Supporting mentorship, community events, and coaching that advance Agile and inclusive leadership.
